VerSys Hip System Device Outcome Study  
NexGen Complete Knee Solution Outcome Study  
Zimmer  
1999 to present

Investigator, Protocol Title: A phase II, randomized, double-blind, active-controlled (Enoxaparin), parallel group, dose-response study of DPC 906-201 for the prevention of deep vein thrombosis in knee replacement surgery.  
Bristol-Myers Squibb Co. Pharmaceutical Research Institute  
Princeton, New Jersey  
October, 2002 – 2003

Investigator, Protocol Title: A phase III, randomized, double-blind, active control study to investigate the efficacy and safety of two different dose regimens in prevention of venous thromboembolism in patients with primary elective total knee replacement surgery.  
Boehringer Ingelheim  
July 2005

Investigator, Protocol title: Pfizer phase 2B randomized multi-center dose ranging study assessing the safety and efficacy of PD 0348292 in the prevention of Venous thromboembolic events and subjects undergoing an elective unilateral total knee replacement protocol A5571010  
Pfizer  
July 2006 - present

Investigator, Protocol title: Record 2 Study: Regulation of coagulation in orthopedic surgery to prevent DVT and PE, controlled, Double-Blind, randomized, study of BAY 59-7939 in the extended prevention of VTE in patients undergoing elective total hip replacement.  
Bayer Healthcare  
October 2006 - present
